VT56
## COMPREHENSIVE TPMS SERVICE TOOL

RESET TPMS IN LESS THAN 2 MINUTES

After servicing tires, the sensor IDs on each wheel must match with the vehicle's ECU.
An OBD2 relearn procedure can be performed for many vehicles; replacing manual or auto relearn procedures.

In 3 easy steps, relearn a TPMS system:

1. Select the vehicle's make, model, year
2. Read all TPMS sensors
3. Connect the OBD2 module to the tool and the vehicle OBD port. Transfer the new sensor IDs to the vehicle

PROGRAM ALL LEADING AFTERMARKET TPMS SENSORS

For multi-brand repair shops, a mix of universal sensors and OE sensors is often required. Our tools support the largest aftermarket sensor list on the market.

sens.it   ALCAR YOUR WHEEL PARTNER   REDI-Sensor   IntelliSens

T-Pro TPMS Sensor   EU-PRO SENSOR   italsensor TPMS   EZ-sensor

MOBILETRON AUTOMOTIVE ELECTRONICS   Orange Electronic   DIRECT-FIT

The VT56 is the all-in-one comprehensive TPMS tool with coverage for European, American and Asian vehicles. The ATEQ VT56 supports all known programmable TPMS sensors and is frequently updated with new features, vehicles and sensors.

VT56 FEATURES

- Triggers all OEM sensors worldwide, displays all sensor data
- Provides comprehensive TPMS relearn procedures (incl. indirect/direct)
- Programs all leading aftermarket programmable sensors
- Displays OBD2 location on tool screen
